WRENCH

Combination wrench . Double open wrench . E-type wrench
Twist Combination wrench 30 & 45 degrees . Ratchet wrench
Adjustable wrench . T-handle . Flexible ratchet wrench

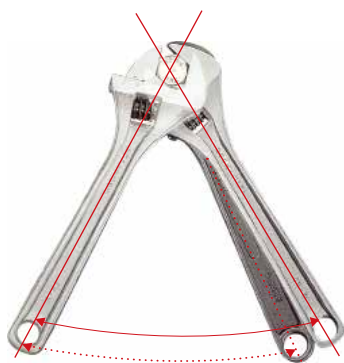

Wrench

• AP Series

A smaller angle (15°) wrench aligns the wrench with the nut in a manner that offers speed, precision, ergonomic comfort and provides greater leverage distance thus reducing hand & arm fatigue. It makes the hardest work easy.

15°

• Compared to 22.5° wrench, a swing angle of 15° is more suitable for operation in limited working area.

• Measuring scale assist you to find demand size speedily.

• Wider Jaw Opening (up to 18~25% wider) increases useful range of fastener sizes.

• Non-Protruding on the movable jaw end. This allows a greater ease of use in tight spaces.

- Ergo handle
- Comfortable hand fit
- Easy to apply the force
- 60% thicker than regular wrench handle

• The first opening action and the last closing action are especially important for this design to loose and the tighten a rusted nut

- Excellent Durability
- Humidity Test over 48 hours
- Perfect resistance to peeling
- Automatic four fold layered plate with triple layers of nickel and single layer of chrome results excellent adherence and rust resistance
- Thickness of nickel : Total 8~12 μm which much higher than standard 5 μm
- Thickness of chrome : 0.1~0.15 μm over normal standard 0.1 μm
- Smaller head tip allows a constricted space entry easily

- Results hard surface
- Remarkable in marking laser-etched on wrench head
- One of the nature surface finish of it's metal body meets the enviromental protection
- Improve the ability of rust resistance, adherence and lubricity from traditional black oxide.
- Smaller head tip allows a constricted space entry easily

• RA Series

• RA Series Features :

- **Anti-Slip** : TPR material handle with ridged design ensures a strong grip.
- **Combination Function** : Ratcheting & Adjusting
- **Comfortable** : "Neo-Comfort Grip" incorporates an artistic handle design.
- **Easy & Convenience** : Swing without lifting up provides a greater ease of use in limited spaces.
- **Faster** : Ratcheting function affers the efficiency compared with the conventional ones, which helps the end-user get the job done faster.
- **Ratcheting Function** : A breakthrough application on traditional hand tools.

- Adjust the tip of moveable jaw toward the hex nut by turning the knurl. The opening of jaw must be the same as the nut width.
- Push the wrench toward the hex nut to set the roller behind the driven corner. Make sure the side adjacent to the roller is completely against the arc.
